

Seeking Unfair Advantage with Business Analytics

www.icpas.org.sg/bizexcel.asp

The **Business Analytics and Reporting (BAR)** programme is certified by the Institute of Certified Public Accountants of Singapore - the national accountancy body which accords the Certified Public Accountant Singapore (CPA Singapore) designation. To date, more than 600 organisations in Singapore have supported this programme, and have recognised the financial analysis and business reporting skill-sets attained from the programme as a 'must-have' for the financial professionals.

At the end of the programme, participants will be able to perform the following tasks and more:

- Design data empires to support all reporting requirements
- Build sustainable excel-based reporting models
- Develop interactive models for decision making
- Conceptualise scenarios and what-if analytics for investment evaluation
- Create visually attractive reports

" Brilliant! Every class ends with an amazing 'wow'. It has never occurred to me that Excel can be used this way and so powerfully. Materials are precise and relevant, very friendly and capturing with all diagrams and colors. Course content is closely related to our work. Impromptu knowledge/tricks are introduced. End of session comments and reviews are value-added. Trainers are very knowledgeable and really understand what an accountant would need in real-life. A very highly recommended course!

PS: You should have come forward earlier to save us. Accountants can go clubbing at month end too!"

Who Should Attend:

CFOs, Financial Controllers, Analysts, Accountants, Bankers, Finance Managers, Businessmen who find generating management reports too time consuming and rigid for analysis purposes.
